

2" & 3" diaphragm pumps ideal for indefinite dry running with no damage to the pump.

| SIZE                              | 2"                                   |
|-----------------------------------|--------------------------------------|
| MODEL                             | Sprite                               |
| HILTA REF                         | H000155                              |
| FRAME/CHASSIS TYPE                | Easy Wheel                           |
| POWER                             | Petrol                               |
| ENGINE TYPE                       | Honda GX120<br>3.2bhp 2.4kW 3000rpm  |
| AVERAGE SOUND PRESSURE LEVEL @ 7m | 77dB(A)                              |
| MAX OUTPUT                        | 11.36m <sup>3</sup> /hr / 2500gal/hr |
| MAX DRY SUCTION LIFT              | 6 Metres                             |
| TOTAL HEAD                        | 18 Metres                            |
| MAX SOLIDS                        | 20mm                                 |
| STARTING                          | Recoil                               |
| FUEL TANK CAPACITY (LITRES)       | 2.5 Litres                           |
| DIMENSIONS (LxWxH)mm              | 740 x 450 x 570                      |
| WET WEIGHT                        | 45 KG                                |

## 2" Sprite

### Features:

- High solids handling
- Petrol
- 'Snore' allows machine to run dry with no damage to the pump end
- Easy wheel chassis

## 3" Drysite D5

### Features:

- High solids handling
- 'Snore' allows machine to run dry with no damage to the pump end
- Easy wheel chassis
